Introduction

The Registry of Space Objects (the National Registry) for which the Grand Duchy of Luxembourg assumes registration obligation is established following the Convention on Registration of Objects Launched into Outer Space, adopted by the United Nations (UN) General Assembly in New York on 12 November 1974 (the Convention), and the Law of 15 December 2020 on Space Activities.

On 27 January 2021, Luxembourg adhered to the [Convention on the Registration of Space Objects](#), becoming the 70th State Party to the Convention. The UN General Assembly adopted the Convention in 1974 to assist in the identification of space objects, address issues regarding States Parties responsibilities concerning their space objects, and ensure open access to the information provided by States and international intergovernmental organizations.

The Registration Convention ensures that a central registry of objects launched into outer space is established and maintained by the Secretary-General of the UN. Thus, once a space object is launched and as soon as practicable, the Registration Convention requires the 'State of registry' to furnish information about the launched space object to the Secretary-General. The UN keeps information provided by State Parties relating to the space objects and the space activity on its website. Furthermore, the Registration Convention requires Luxembourg to maintain its own appropriate registry of space objects, also embodied in Chapter 7, Article 15 in the [Law of 15 December 2020](#).

Prior to becoming a State Party to the Registration Convention, Luxembourg voluntarily provided registration information of space objects under [Resolution 1721 B \(XVI\)](#). Following adherence to the Convention, registration submissions are in accordance with Article IV of the Convention.

For information regarding registration information of space objects already submitted by Luxembourg to the UN, please refer to the United Nations Office for Outer Space Affairs (UNOOSA) [website](#).

Definition of Terms

Apogee: The furthest distance in the space object's orbit from the surface of the body it is orbiting.

Change of Status: The date of the space object's decay, reentry, recovery, deorbit, or landing.

Change of Status in Operations:

Date when space object is no longer functional: The date using Coordinated Universal Time (UTC) (also referred to as Greenwich Mean Time (GMT)) when the space object ceases to perform operational functions for the State of registry.

Date when space object is moved to a disposal orbit: The date using Coordinated Universal Time (UTC) when the space object is moved into a disposal orbit. See COPUOS Space Debris Mitigation Guidelines for recommendations on disposal orbits, [link](#)

Physical conditions when space object is moved to a disposal orbit: The physical conditions when the space object is moved into a disposal orbit. Conditions can include the change in orbit (e.g. +300 km above GSO), passivation of the space object and other measures as recommended in the COPUOS Space Debris Mitigation Guidelines.

Change of Supervision of the Space Object:

Date of change in supervision: The date using Coordinated Universal Time (UTC) (also referred to as Greenwich Mean Time (GMT)) when the new owner or operator takes supervision of the space object.

Identity of the new owner or operator: The identity of the new owner or operator of the space object.

Change of orbital position in the geostationary orbit

Previous orbital position: The previous operational location of the space object in \pm degrees East along the equator from the Greenwich meridian.

New orbital position: The new operational location of the space object in \pm degrees East along the equator from the Greenwich meridian.

Change of function of the space object: The function of the space object following change in supervision.

COSPAR International Designator: Alphanumeric designator established by the Committee on Space Research (COSPAR) for space objects that successfully reach Earth orbit and beyond. The designator can be obtained from the [Online Index of Objects Launched into Outer Space](#).

Date of Launch: The date of launch of the space object using Coordinated Universal Time (UTC) (also referred to as Greenwich Mean Time (GMT)).

General Function of Space Object: General information on the space object. Can include mission objectives, frequency plans, etc. If required, please attach text in a separate page.

Geostationary Position: Applicable only to space objects in the geostationary orbit. Planned and/or actual location of space object in \pm degrees East along the equator from the Greenwich meridian (e.g. for 10.5 degrees West, use -10.5 degrees East).

Inclination: The angle relative to the equator of the Earth or celestial body the space object is orbiting. Measured counter-clockwise from the equator, stated in degrees.

Launching State: a) A State that launches or procures the launching of a space object; b) A State from whose territory or facility a space object is launched. In accordance with Article II of the Registration Convention, only one State of registry can exist for a space object. When more than one launching State exists, they should jointly determine which State should register the space object.

Nodal period: Time taken by the space object to complete one revolution around the body it is orbiting.

Perigee: The closest distance in the space object's orbit from the surface of the body it is orbiting.

State of Registry / Intergovernmental Organization: The launching State that carries the space object on its national registry of objects into outer space or the organization that has declared its acceptance of the rights and obligations provided for in accordance with Article VII of the Registration Convention. In accordance with Article II of the Registration Convention, only one State of registry can exist for a space object. When more than one launching State exists, they should jointly determine which State should register the space object.

Territory or location of launch: The territory or location of the launch of the space object. For a table of global launch locations, see <http://www.unoosa.org/oosa/SORegister/resources.html>

Website: Address on the World Wide Web for information on the space object/mission/operator.

ASTRA 1A

COSPAR International 1988-109B
Designator:
National Designation No.: /

Owner / Operator Name: Société Européenne des Satellites (SES
ASTRA S.A.)

Launch Date and Time: 11/12/1988

Launch Location: Kourou, French Guiana

Launch Vehicle Name: Ariane

Date of Decommissioning: 10/12/2004

Additional Information: The satellite is in a graveyard orbit, at a minimum perigee altitude of 400 km above the geostationary orbit

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1B

COSPAR International 1991-015A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.
Launch Date and Time: 02/03/1991
Launch Location: Kourou, French Guiana
Launch Vehicle Name: Ariane

Date of Decommissioning: 12/07/2006
Additional Information: The satellite is in a graveyard orbit, at a minimum perigee altitude of 500 km above the geostationary orbit

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1C

COSPAR International 1993-031A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.
Launch Date and Time: 12/05/1993
Launch Location: Kourou, French Guiana
Launch Vehicle Name: Ariane

Date of Decommissioning: 31/07/2014
Additional Information: The satellite is in a graveyard orbit, at a minimum perigee altitude of 387 km above the geostationary orbit

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1D

COSPAR International 1994-070A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.

Launch Date and Time: 31/10/1994

Launch Location: Kourou, French Guiana

Launch Vehicle Name: Ariane

Nodal Period: 1,435.8-1,436.4 minutes

Inclination: Uncontrolled inclination since 22/10/2007. Orbital inclination is therefore increasing over time and was 9.2 degrees on 10/08/2020

Apogee: 35,820 kilometers

Perigee: 35,752 kilometers

Geostationary Position: 73,0 degrees West since 30/11/2017

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services and of occasional-use services

Entry Date into National 02/03/2021ⁱ

Registry:

ASTRA 1E

COSPAR International 1995-055A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.

Launch Date and Time: 19/10/1995

Launch Location: Kourou, French Guiana

Launch Vehicle Name: Ariane

Date of Decommissioning: 12/06/2015

Additional Information: The satellite is in a graveyard orbit, at a minimum perigee altitude of 390 km above the geostationary orbit

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1F

COSPAR International 1996-021A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.
Launch Date and Time: 08/04/1996
Launch Location: Baikonur, Kazakhstan
Launch Vehicle Name: Proton

Date of Decommissioning: 04/11/2020
Additional Information: The satellite is in a graveyard orbit, at a minimum perigee altitude of 312 km above the geostationary orbit

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1G

COSPAR International 1997-076A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.

Launch Date and Time: 02/12/1997

Launch Location: Baikonur, Kazakhstan

Launch Vehicle Name: Proton

Nodal Period: 1,435.8-1,436.4 minutes

Inclination: Uncontrolled inclination since 23/05/2014. Orbital inclination is therefore increasing over time and was 4.7 degrees on 10/08/2020

Apogee: 35,820 kilometers

Perigee: 35,752 kilometers

Geostationary Position: 63.24 degrees East since 18/08/2019

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services

Entry Date into National Registry: 02/03/2021ⁱ

Annex 1: ASTRA 1G

New Basic Orbital Parameters

| | |
|---|--|
| Inclination: | Uncontrolled inclination since 23/05/2014. Orbital inclination is therefore increasing over time and was 5.2 degrees on 10/02/2021 |
| Geostationary position: | 19.4 degrees East from 10/02/2021 |
| Entry Date into National Registry: | 02/03/2021 |

ASTRA 2A

COSPAR International 1998-050A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.
Launch Date and Time: 30/08/1998
Launch Location: Baikonur, Kazakhstan
Launch Vehicle Name: Proton

Nodal Period: 1,435.8-1,436.4 minutes
Inclination: Uncontrolled inclination since 10/08/2018. Orbital inclination is therefore increasing over time and was 1.8 degrees on 10/08/2020
Apogee: 35,820 kilometers
Perigee: 35,752 kilometers
Geostationary Position: 28 degrees East since 06/08/2020

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1H

COSPAR International 1999-033A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.
Launch Date and Time: 18/06/1999
Launch Location: Baikonur, Kazakhstan
Launch Vehicle Name: Proton

Date of Decommissioning: 12/10/2019
Additional Information: The satellite is in a graveyard orbit, at a minimum perigee altitude of 340 km above the geostationary orbit

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 2B

COSPAR International 2000-054A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.

Launch Date and Time: 14/09/2000

Launch Location: Kourou, French Guiana

Launch Vehicle Name: Ariane 5

Nodal Period: 1,435.8-1,436.4 minutes

Inclination: Uncontrolled inclination since 07/06/2014. Orbital inclination is therefore increasing over time and was 4.6 degrees on 10/08/2020

Apogee: 35,820 kilometers

Perigee: 35,752 kilometers

Geostationary Position: 19.6 degrees East since 01/10/2019

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services

Entry Date into National 02/03/2021ⁱ

Registry:

Annex 1: ASTRA 2B

New Basic Orbital Parameters

Additional Information:

The satellite is in a graveyard orbit, at a minimum perigee altitude of 340 km above the geostationary orbit

Apogee:

36,221 kilometers

Perigee

36,124 kilometers

Entry Date into National

15/07/2021

Registry:

ASTRA 2D

COSPAR International 2000-081A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.

Launch Date and Time: 20/12/2000

Launch Location: Kourou, French Guiana

Launch Vehicle Name: Ariane 5

Nodal Period: 1,435.8-1,436.4 minutes

Inclination: Uncontrolled inclination since 22/04/2014. Orbital inclination is therefore increasing over time and was 5.9 degrees on 10/08/2020

Apogee: 35,820 kilometers

Perigee: 35,752 kilometers

Geostationary Position: 57.25 degrees East since 05/03/2020

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 2C

COSPAR International 2001-025A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.

Launch Date and Time: 16/06/2001

Launch Location: Baikonur, Kazakhstan

Launch Vehicle Name: Proton

Nodal Period: 1,435.8-1,436.4 minutes

Inclination: Uncontrolled inclination since 09/11/2016. Orbital inclination is therefore increasing over time and was 3.0 degrees on 10/08/2020

Apogee: 35,820 kilometers

Perigee: 35,752 kilometers

Geostationary Position: 23.7 degrees East since 23/05/2018

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services

Entry Date into National Registry: 02/03/2021ⁱ

Annex 1: ASTRA 2C

New Basic Orbital Parameters

| | |
|---|---|
| Nodal Period: | 1,435.8-1,436.4 minutes |
| Inclination: | Uncontrolled inclination since 09/11/2016. Orbital inclination is therefore increasing over time and was 3.85 degrees on 18/08/2021 |
| Apogee: | 35,820 kilometers |
| Perigee: | 35,752 kilometers |
| Geostationary Position: | 72.5 degrees West since 23/05/2018 |
| Entry Date into National Registry: | 30/08/2021 |

ASTRA 3A

COSPAR International 2002-015B
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A.
Launch Date and Time: 29/03/2002
Launch Location: Kourou, French Guiana
Launch Vehicle Name: Ariane 4

Nodal Period: 1,435.8-1,436.4 minutes
Inclination: Uncontrolled inclination since 29/03/2012. Orbital inclination is therefore increasing over time and was 6.0 degrees on 10/08/2020

Apogee: 35,820 kilometers
Perigee: 35,752 kilometers
Geostationary Position: 86.85 degrees West since 06/12/2019

General Function of Object: Encrypted and unencrypted transmission of radio, television and multimedia data services; occasional-use services and very small aperture terminal (VSAT) services

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1KR

COSPAR International 2006-012A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A. (through its subsidiary
SES ASTRA 1KR S.à r.l.)
Launch Date and Time: 20/04/2006
Launch Location: Cape Canaveral, United States of America
Launch Vehicle Name: Atlas V

Nodal Period: 1,435.8-1,436.4 minutes
Inclination: 0.10 degrees
Apogee: 35,820 kilometers
Perigee: 35,752 kilometers
Geostationary Position: 19.2 degrees East

General Function of Object: Encrypted and unencrypted transmission of
radio, television and multimedia data
services

Entry Date into National 02/03/2021ⁱ
Registry:

ASTRA 1L

COSPAR International 2007-016A

Designator:

National Designation No.: /

Owner / Operator Name: SES ASTRA S.A. (through its subsidiary
SES ASTRA 1L S.à r.l.)

Launch Date and Time: 04/05/2007

Launch Location: Kourou, French Guiana

Launch Vehicle Name: Ariane 5

Nodal Period: 1,435.8-1,436.4 minutes

Inclination: 0.10 degrees

Apogee: 35,820 kilometers

Perigee: 35,752 kilometers

Geostationary Position: 19.2 degrees East

General Function of Object: Encrypted and unencrypted transmission of
radio, television, multimedia data and
broadband services

**Entry Date into National
Registry:** 02/03/2021ⁱ

ASTRA 1M

COSPAR International 2008-057A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A. (through its subsidiary
SES ASTRA 1M S.à r.l.)
Launch Date and Time: 05/11/2008
Launch Location: Baikonur, Kazakhstan
Launch Vehicle Name: Proton-M/Breeze-M

Nodal Period: 1,435.8-1,436.4 minutes
Inclination: 0.10 degrees
Apogee: 35,820 kilometers
Perigee: 35,752 kilometers
Geostationary Position: 19.2 degrees East

General Function of Object: Encrypted and unencrypted transmission of
radio, television and multimedia data
services

Entry Date into National 02/03/2021ⁱ
Registry:

ASTRA 3B

COSPAR International 2010-021A
Designator:
National Designation No.: /

Owner / Operator Name: SES ASTRA S.A. (through its subsidiary
SES 3B S.à r.l.)
Launch Date and Time: 21/05/2010
Launch Location: Kourou, French Guiana
Launch Vehicle Name: Ariane 5

Nodal Period: 1,435.8-1,436.4 minutes
Inclination: 0.10 degrees
Apogee: 35,820 kilometers
Perigee: 35,752 kilometers
Geostationary Position: 23.5 degrees East since 10/06/2010

General Function of Object: Encrypted and unencrypted transmission of
radio, television, multimedia data, VSAT
and broadband services

Entry Date into National Registry: 02/03/2021ⁱ

ASTRA 1N

| | | |

Launch Location: Cape Canaveral, United States of America
Launch Vehicle Name: SpaceX Falcon 9

Nodal Period: 1,435.8-1,436.4 minutes
Inclination: 0.05 degrees
Apogee: 35,820 kilometers
Perigee: 35,752 kilometers
Geostationary Position: 21.42 degrees East

General Function of Object: Provision of governmental and institutional communication services

Entry Date into National Registry: 02/03/2021ⁱ

FM91, LEMUR 2 REMY-COLTON

COSPAR International 2018-111J
Designator:
National Designation No.: /

Owner / Operator Name: Spire Global Luxembourg S.à r.l.
Launch Date and Time: 27/12/2018
Launch Location: Vostochny Cosmodrome, Russian Federation
Launch Vehicle Name: Soyuz 2.1 a

Nodal Period: 96.2 minutes
Inclination: 97.73 degrees
Apogee: 576 kilometers
Perigee: 576 kilometers
Longitude of the Ascending Node: 139.3 degrees

General Function of Object: Earth exploration and meteorology ("Automatic Identification System" (AIS), "Automatic Dependent Surveillance-Broadcast" (ADS-B), "Global Navigation Satellite System Radio Occultation/Reflectometry" (GNSS-RO/R))

Entry Date into National Registry: 02/03/2021ⁱ

Launch Location: Plesetsk, Russian Federation
Launch Vehicle Name: Soyuz-2.1 b/Fregat

Nodal Period: 96.0 minutes
Inclination: 97.66 degrees
Apogee: 575 kilometers
Perigee: 475 kilometers
Longitude of the Ascending Node: 28.38 degrees

General Function of Object: Earth exploration and meteorology, Inter-Satellite Link experimentation

Entry Date into National Registry: 02/03/2021ⁱ

FM137, LEMUR 2 BAXTER-OLIVER, LEMUR 2 V4.7

COSPAR International 1998-067RV
Designator:
National Designation No.: /

Owner / Operator Name: Spire Global Luxembourg S.à r.l.
Launch Date and Time: 03/10/2020
Launch Location: Wallops, Virginia, United States
Launch Vehicle Name: Antares

Nodal Period: 93.1 minutes
Inclination: 51.6 degrees
Apogee: 421 kilometers
Perigee: 409 kilometers
Longitude of the Ascending Node: 8.25 degrees (RAAN, M50)

General Function of Object: Earth exploration and meteorology, Inter-Satellite Link experimentation

Additional Information: The satellite was deployed from the International Space Station (ISS) on 05/11/2020

Entry Date into National Registry: 02/03/2021ⁱ
